

Category	Provider / Tool	Purpose	Information Collected	Typical Duration / Control
Strictly necessary	[Insert from CMP / scan]	Site operation, security, consent management, account, donation, checkout and transaction functionality.	Technical identifiers, session data, consent choices, security signals or transaction-related technical data.	Session or short-term persistent; generally cannot be disabled where necessary.
Functionality	[Insert from CMP / scan]	Remember preferences and improve usability.	Preference settings such as language, region, display or form settings.	As configured; may be managed through preferences or browser settings.
Analytics / performance	[Insert from CMP / scan, e.g., analytics provider if used]	Measure usage, traffic, errors, interactions, campaign and content performance.	IP address, device/browser information, pages viewed, referring URLs, interactions and usage patterns.	As configured; subject to consent or opt-out where required.
Advertising / targeting / outreach	[Insert from CMP / scan if used]	Measure or support campaigns, outreach, relevance and engagement.	Device/browser information, pages viewed, campaign interactions, referral data and engagement signals.	As configured; subject to consent, preferences and opt-out where required.
Email / communications	[Insert email platform if applicable]	Measure message delivery, opens, clicks and communication effectiveness.	Email interaction data, links clicked, device/browser information and communication preferences.	As configured; unsubscribe and preference tools may apply.
Security / fraud prevention	[Insert from CMP / scan]	Protect systems, transactions, donors, users, children and beneficiaries from misuse or unauthorized activity.	Technical identifiers, security events, fraud signals, device/browser information and transaction-risk signals.	As necessary for security, legal, audit and operational purposes.
